SKILLS

Programming Languages & Libraries:	Python (Pandas, NumPy, SciPy, Matplotlib)
Business Intelligence & Visualization:	Power BI, Tableau, Microsoft Excel (Pivot Tables, VLOOKUP, Conditional Formatting), Google Sheets.
Databases:	MS SQL Server, MySQL, PostgreSQL, MongoDB
Data Analytics & Management:	Data Cleaning, Data Transformation, Data Modeling, KPI Tracking Dashboard Development, Business Reporting.
Tools & Technologies:	Microsoft Power Query, DAX, DataBricks.
Soft Skills:	Critical Thinking, Problem Solving, Effective Communication, Team Collaboration

PROJECTS

Health Care Analysis [\(Documentation\)](#) [\(Visual\)](#) May 2025

Tools Used: PowerBI (Power Query, Dax), GitHub

- Transformed patient data using Power Query and built a clean data model with a custom date table for time-based analysis.
- Designed interactive Power BI dashboards with slicers and filters to analyze demographics, admissions, and diagnoses.
- Developed custom DAX measures to track key metrics and deliver actionable insights for healthcare decision-making.

Contoso Sales Analysis [\(Documentation\)](#) [\(Visual\)](#) April 2025

Tools Used: Excel, PowerBi, Microsoft Access (.accdb), GitHub

- Downloaded and integrated a Microsoft Access database (.accdb) file into Power BI using the Microsoft.ACE.OLEDB.12.O provider.
- Cleaned and transformed raw sales data for analysis using Power Query Editor.
- Created a data model and designed intuitive visuals to display key metrics.
- Developed custom DAX measures, including Average Sales per Transaction, total revenue, and transaction frequency.
- Enabled data-driven insights by designing interactive dashboards with date filters, customer segments, and product categories.

AdventureWorks Analysis [\(Link\)](#) January 2025

Tools Used: MS SQL Server, SSMS, GitHub

- Downloaded and restored the AdventureWorks database using SSMS to explore relational data across Sales, Customers, Products, and Finance.
- Wrote advanced SQL queries (JOINS, CTEs, subqueries), created views and stored procedures to support reusable reporting.
- Performed data cleaning and analysis to simulate real-world BI scenarios and deliver actionable business insights.

WORK EXPERIENCE

Data Analyst (Internship) [@ Dahel Techies and Consultants](#)
September 2024 – January 2025

- Extracted and cleaned over 10,000 rows using SQL queries to ensure accuracy and remove inconsistencies.
- Analyzed monthly sales trends across various regions and product categories to identify underperforming areas.

- Developed interactive dashboards in Power BI that visualized key performance indicators (KPIs) such as total revenue, sales growth rate, and product-wise contribution.
- Reduced reporting time by 60% through automation and dashboard implementation.

Data Analyst (Remote Contract)

@ EMB Shop Cotonou, Benin Republic

August 2024 - October 2024

- Automated cleaning of supermarket sales data using Excel Macros, improving accuracy and reducing manual effort.
- Analyzed product performance and mobile money payment trends (MTN, MOOV, Celtics) to uncover customer preferences.
- Created visual dashboards in Power BI/Excel to present sales insights, cutting reporting time by 60%.

EDUCATION

Kesmonds International Universtiy (Ngaoundere, Cameroon)
Bachelor Of Computer Science

2021 - 2024

INTERESTS

TED Talks, Self-Learning/Development, Soccer, Learning Languages (currently learning French)
